

Robotic Lights

Outline

Special light source for robot arms. Integrated light source, the ring light and square bevel light, can solve four-corner shadow and four-corner edge contour problems.

Feature

1. Applied with the robotic arms for inspection.
2. Customized service is accepted.

Major applications

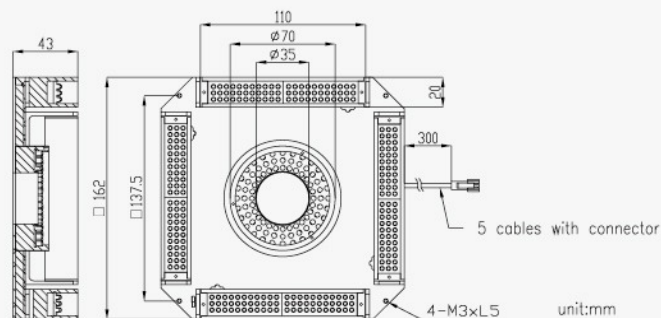

1. Positioning for substrates and printed boards, inspection for chip components.
2. Fabrication substrates crack inspection, metal board surface inspection.
3. Identify for multiple shapes.
4. Identify size measurement and shape for electronic parts.

Available Models

Model	Color	Power Consumption	Weight (g)	Dimension
GL-RB01W-24	○	24V/21.35W	630.5	1
GL-RB02W-24	○	24V/35.42W	970.5	2
